DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to an apparatus for supplying slurry, classified in class 366, subclass 152.1.
 - II. Claims 6-7 , drawn to preparing CMP slurry, classified in class 451, subclass 36.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used to make cement slurry, or the process can be practiced without dampers and pressurization valves.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to the Office of Joe Scafetta, Jr on 3-5-2005 to request an oral election to the above restriction requirement, but did not result in an

election being made. Whereby it had been indicated by the applicant's representative that restrictions made by the PTO is to be asked to be made in writing.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
